

ALS UNITED KINGDOM

VITAMINS AND ADDITIVES

right solutions.
right partner.

ALS offers a wide scope of accredited analyses of vitamins in food, dietary supplements, and cosmetics. We can also perform the analysis in food for special nutrition (e.g. baby food/). Clients receive fast and accurate analysis of their samples. Our dedicated laboratory facilities help secure the stability of vitamins whilst our professional and highly skilled staff are always happy to provide clients with technical advice and support.
